## DETAILED ACTION

### *Response to Amendment*

Amendments filed 08/18/2008 have been entered.

### *Allowable Subject Matter*

Claims 1, 3, 5, 6, 9-16, 19, 20, and 22 are allowed.

The following is an examiner's statement of reasons for allowance:

With regards to independent claim 1, the prior art fails to teach or reasonably suggest a method comprising the step of: determining at least one static object area and at least one at least partially moving object area with reference to the examination object with the aid of cyclical intrinsic movement, with detection of the cyclical intrinsic movement of a subarea of the examination object performed in a current scanning area by comparing an intensity measurement of at least one pair of time-offset rays on a common ray axis, and with the determining performed during the scanning, when taken in combination with the other limitations of the claim.

Dependent claims 3, 6, and 9-12 are allowable by virtue of their dependency.

With regards to independent claim 13, the prior art fails to teach or reasonably suggest an apparatus comprising a means for determining at least one static object area and at least one at least partially moving object area with reference to the examination object with the aid of cyclical intrinsic movement, with detection of the cyclical intrinsic movement of a subarea of the examination object performed in a

current scanning area by comparing an intensity measurement of at least one pair of time-offset rays on a common ray axis, and with the determining performed during the scanning, when taken in combination with the other limitations of the claim.

Dependent claims 14, 15, and 19 are allowable by virtue of their dependency.

With regards to independent claim 20, the prior art fails to teach or reasonably suggest a method comprising the step of: determining at least one static object and at least one at least partially moving object area with reference to the examination object with the aid of cyclical intrinsic movement, with a detection of the cyclical intrinsic movement of a subarea of the examination object performed in a current scanning area by comparing an intensity measurement of at least one pair of time-offset rays on a common ray axis, and with the determining performed during the scanning, when taken in combination with the other limitations of the claim.

Dependent claim 5 is allowable by virtue of their dependency.

With regards to independent claim 22, the prior art fails to teach or reasonably suggest an apparatus comprising: a means for determining at least one static object and at least one at least partially moving object area with reference to the examination object with the aid of cyclical intrinsic movement, with a detection of the cyclical intrinsic movement of a subarea of the examination object performed in a current scanning area by comparing an intensity measurement of at least one pair of time-offset rays on a common ray axis, and with the determining performed during the scanning, when taken in combination with the other limitations of the claim.

Dependent claim 16 is allowable by virtue of their dependency.

While determining a motionless region and a moving region and a method of detecting motion by comparing an intensity measurement of at least one pair of time-offset rays on a common ray axis is known (see **Pan et al. US 2003/0163039** and **Hsieh US 6,421,552** respectively), it is not suggested in the art to determine at least one static object and at least one moving object during the scanning.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Response to Arguments***

Applicant's arguments, see pages 9-10, filed 08/18/2008, with respect to claims 1, 3, 5, 6, 9-16, 19, 20, and 22 have been fully considered and are persuasive. The rejection of 1, 3, 5, 6, 9-16, 19, 20, and 22 has been withdrawn.
